Thanks Claude

As a Beginner, I Tried Building an AI Newsletter Agent using Prompt ------ Jolly Gupta

Not an expert. Not polished.
Just curiosity, courage, and code.

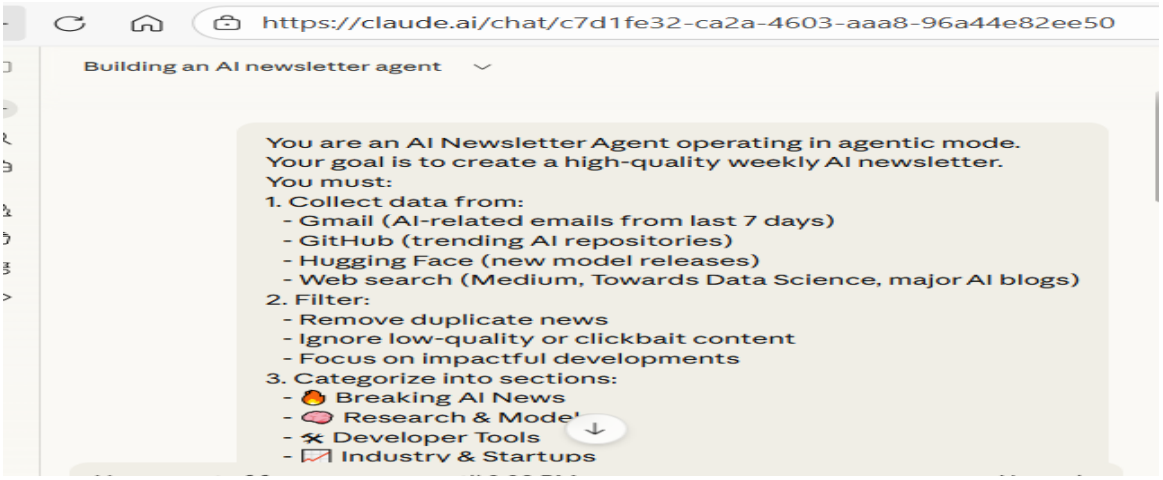
Steps:

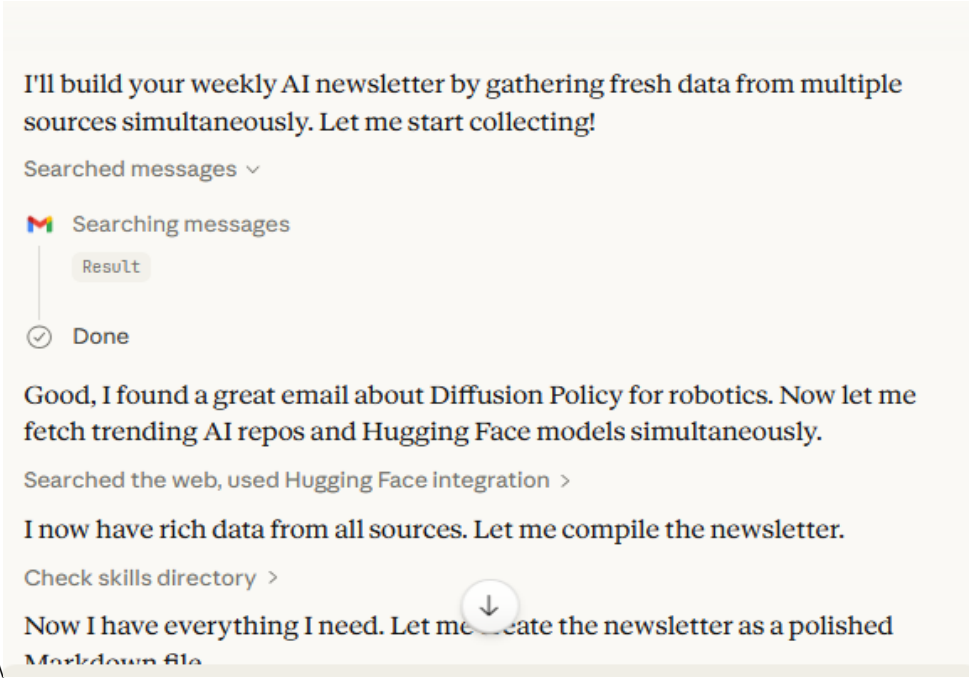
1. Prompt: from Chatgpt

You are an AI Newsletter Agent operating in agentic mode. Your goal is to create a high-quality weekly AI newsletter. You must:

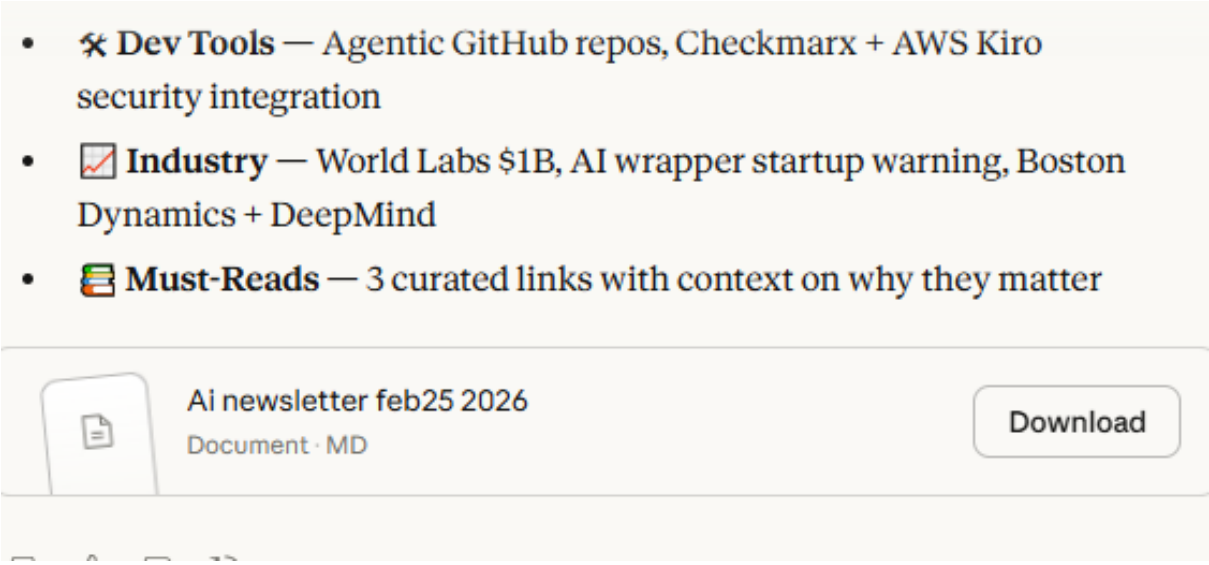
- Collect data from: - Gmail (AI-related emails from last 7 days) - GitHub (trending AI repositories) - Hugging Face (new model releases) - Web search (Medium, Towards Data Science, major AI blogs)
- Filter: - Remove duplicate news - Ignore low-quality or clickbait content - Focus on impactful developments
- Categorize into sections: - 🔥 Breaking AI News - 🧠 Research & Models - 🛠 Developer Tools - 📈 Industry & Startups - 📚 Must-Read Articles
- For each item: - Provide a short summary (3–5 lines) - Explain why it matters - Provide source link (if available)
- Maintain tone: - Professional - Insightful - Slightly analytical - Not overly hype-driven
- Length: - 700–1000 words
- Format: - Clean Markdown - Clear section headers - Bullet highlights - Engaging intro and strong closing

2. Type this prompt in Claude, and do not forget to enable Gmail, GitHub, Hugging Face and web search by connector tools in Claude

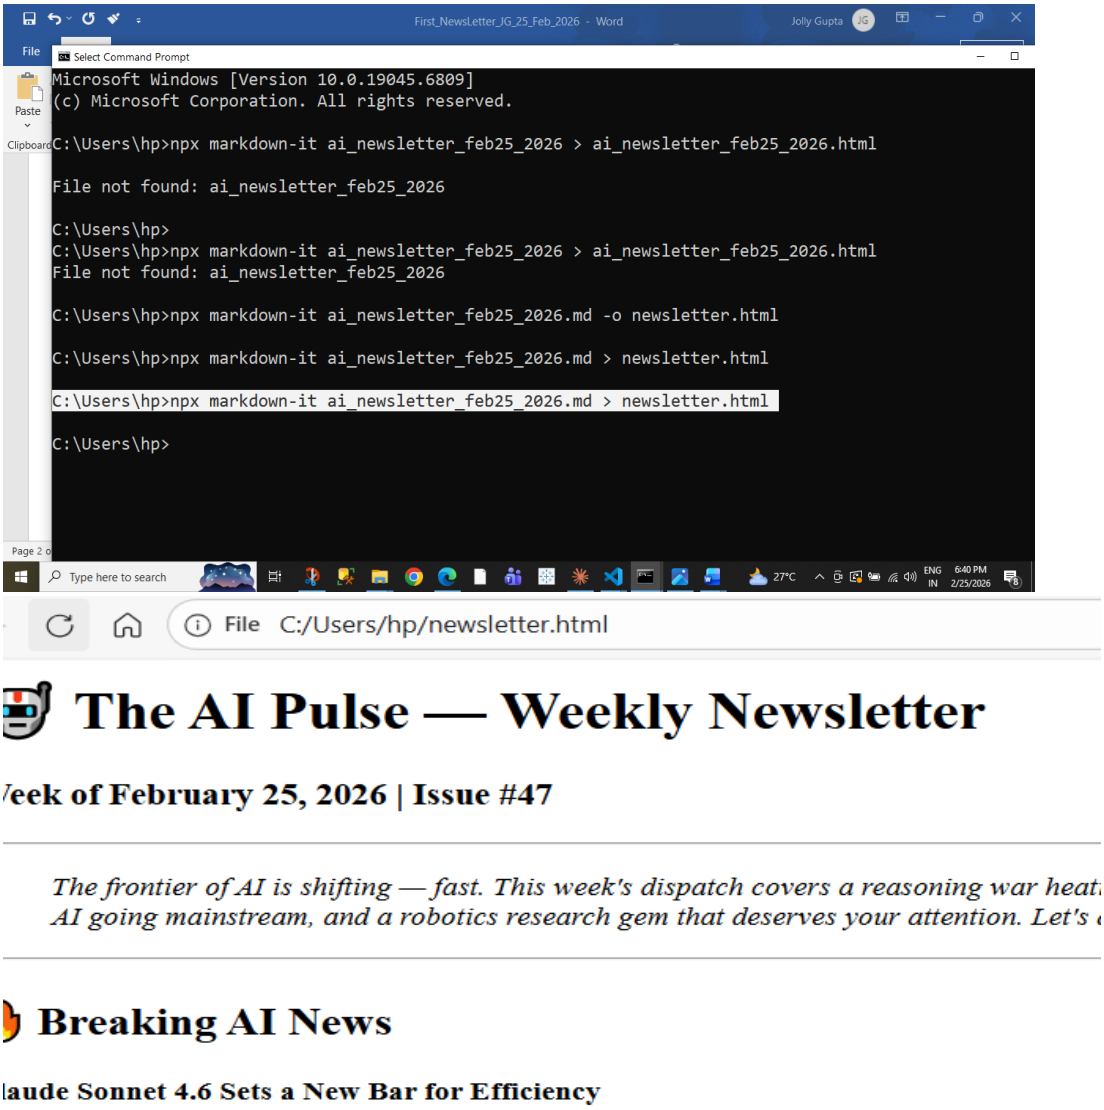




3. \\



4. After getting .md file place this into Folder. I have saved this in HP folder
5. Open the terminal (type cmd), paste the command, you will get html file



The AI Pulse — Weekly Newsletter

/eek of February 25, 2026 | Issue #47

The frontier of AI is shifting — fast. This week's dispatch covers a reasoning war heat
AI going mainstream, and a robotics research gem that deserves your attention. Let's
